using the computer system to receive a first signal from the computer providing the secured capability, the first signal comprising a reusable identifier corresponding to the secured capability, the reusable identifier assigned

The accused instrumentality practices using the computer system (e.g., authentication server of the accused instrumentality, etc.) to receive a first signal (e.g., user_session_id set response, etc.) from the computer (e.g., server of the accused instrumentality) providing the secured capability (e.g., secure connection with the website, etc.), the first signal comprising a reusable identifier (e.g., user_session_id, etc.) corresponding to the secured capability (e.g., secure connection with the website, etc.), the reusable identifier assigned for use by the secured capability for a finite period of time (e.g., expiry date and time).

for use by the secured capability for a finite period of time;

As shown, the website of the accused instrumentality practices providing a secure connection with a user's device (electronic device of the user) through HTTPS connections. This is achieved by an authentication server (a computer system) authenticating users seeking to perform actions such as account login, movie ticket booking, etc., (interactions) ensuring that interactions with secured features are protected from unauthorized access. The server sends a response to set the user_session_id value set by the user device.

As shown, the user_session_id token set by the end device is reused in all further communications with the server. The user session token also mentions an expiry date and time for the token, indicating that it can be reused for a finite period.

The screenshot displays the Fiddler interface with the 'Request Headers' tab selected. The request is a POST to /signin using HTTP/1.1. The 'Host' header is highlighted with a red box and labeled 'Host: www.santikos.com'. Below the request headers, the 'Cookies' tab is selected, showing a response with 330 bytes of cookie data. A red box highlights the 'Set-Cookie' header, which includes a long session ID and an expiration date of 'Tue, 20 Nov 2029 05:30:50 GMT'. A red line connects this expiration date to a red box labeled 'Finite period of time'. Another red line points from the text 'receive a first signal from the computer' to the start of the cookie data.

<p>using a processor of the computer system to evaluate, based at least on the first signal and the second signal, whether the user is authorized to conduct the at least one interaction with the secured capability; and</p>	<p>The accused instrumentality practices using a processor of the computer system (e.g., processor of the authentication server of the accused instrumentality, etc.) to evaluate, based at least on the first signal (e.g., a user_session_id set response, etc.) and the second signal (e.g., a request signal from the user device), whether the user is authorized to conduct the at least one interaction (e.g., account login, movie ticket booking, etc.) with the secured capability (e.g., secure connection with the website, etc.).</p> <p>The server compares the reusable identifier, such as the token (e.g., user_session_id), in the first response received from the server with the token included in the client's subsequent request. If a match is found, the server authenticates the user and processes the request securely.</p>

The image shows a Fiddler network capture. The top pane displays the 'Request Headers' for a POST request to `/signin HTTP/1.1`. The 'Host' header is `www.santikos.com`, which is highlighted with a red box. The bottom pane shows the 'Response' sent, which includes a 'Set-Cookie' header. The cookie value is a long alphanumeric string followed by `expires=Tue, 20 Nov 2029 05:30:50 GMT; Max-Age=157680000; path=/; secure; HttpOnly`. A red box highlights the entire 'Set-Cookie' line. A red line connects the 'Host' header to the 'Set-Cookie' line, with the text 'receive a first signal from the computer' written in red above it. Below the 'Set-Cookie' line, a red box contains the text 'Finite period of time'.
